

What is claimed is:

1. A gate for trampoline safety fence, said trampoline including a round elastic jumping bed fixed to a ground frame, and said safety fence including a protective net supported on a plurality of posts to enclose a space above said jumping bed; said gate comprising an opening at a joint of two sewed ends of said protective net, and said joint of said two sewed ends of said protective net being provided with user-controllable and selectively openable fastening elements.
2. The gate for trampoline safety fence as claimed in claim 1, wherein said protective net is overlapped at said two sewed ends by a predetermined width to form an overlapped portion containing said opening of said gate, and said selectively openable fastening elements are provided on said protective net within said overlapped portion to correspond to said sewed ends.
3. The gate for trampoline safety fence as claimed in claim 2, wherein said overlapped portion is provided with at least one said selectively openable fastening

element.

4. The gate for trampoline safety fence as claimed in
claim 1, wherein said selectively openable fastening
5 element comprises a magic tape.

5. The gate for trampoline safety fence as claimed in
claim 2, wherein said selectively openable fastening
element comprises a magic tape.

10

6. The gate for trampoline safety fence as claimed in
claim 3, wherein said selectively openable fastening
element comprises a magic tape.

15 7. The gate for trampoline safety fence as claimed in
claim 1, wherein said selectively openable fastening
element comprises a zipper.
